

## Minimum Technical Equipment

In order to participate in calls for tender from Terna and Terna Group Companies, candidates must be registered on the Procurement Portal and possess:

- I. the minimum system requirements which can be checked via the Home Page of the “System Requirements” Portal (<https://portaleacquisti.terna.it/esop/common-host/public/browserenv/requirements.jsp>);
- II. a valid digital signature certificate issued by a qualified trust service provider (digital signature) on the trusted list published by the Agency for Digital Italy (AGID) (<https://www.agid.gov.it/en>) the candidate can refer to, or by the Member State where it is established, generated by a secure signature creation device;
- III. a certified electronic address (PEC) issued by a body included in the list of certified email providers, kept by the Agency for digital Italy (AGID) (<https://www.agid.gov.it/en>) to which it is possible to apply.

Once registered, an invitation to tender will be delivered to the PEC address indicated in the system during registration, from the PEC address [portalegareterna@pec.terna.it](mailto:portalegareterna@pec.terna.it).

Therefore, in the absence of a PEC address, the notification of invitation to tender cannot be ensured.

The Procurement Portal will send other communications which do not require PEC from the ordinary address [comunicazioni-portalegareterna@terna.it](mailto:comunicazioni-portalegareterna@terna.it).

To request clarification or support, please contact the Operations Centre via the communication channels included in the “Help” section of the Portal’s Home Page.
